Engineering for life

Degree Apprenticeship

Could it be you?

Are you studying a funded degree in civil engineering and want to take your first career steps as an apprentice? If so, please read on!

This is a fantastic opportunity for someone with a lot of enthusiasm for progressing a career in civil and structural engineering and all the great technologies this brings. The role can be based out of any of our four offices – Northampton, London, Birmingham and Cheltenham – and we are happy to discuss a mix of home working too.

A bit about us

DSA are a brilliant bunch of civil and structural engineers, all passionate about engineering a world where people feel connected and safe in their environments. We call it engineering for life.

Formed in 1996 we operate across the UK, with offices in Northampton, London, Birmingham and Cheltenham, and always have an exciting mix of projects on the table. Opportunities to learn, grow and make a difference are here for the taking, making DSA the ideal next step for your career.

Key responsibilities

- Collaborate and liaison with senior engineers on various civil and structural projects initially working as a technician with the end goal of developing into a qualified engineer
- Assist in the preparation of technical design and drawings utilising Tekla and Autodesk software
- Work independently to prepare documentation, checking and reporting on progress
- Gain exposure to CDM (Construction Design and Management) regulations & Building Safety Act and contribute to the development of H&S and CDM documentation
- Work with project teams to ensure timely and accurate project delivery, incorporating best practices.
- Engage in continuous learning, both on the job and through academic coursework

Qualifications and skills

- 112 UCAS Points – incl. B in A Level Maths
- Enthusiastic and committed individual with a strong interest in the built environment
- Willingness to learn and apply new technologies
- Good analytical and problem-solving skills
- Effective communication skills, both written and verbal
- Strong attention to detail and a proactive approach to work

What we offer

- Comprehensive training and development in BIM, Revit, and general civil/structural engineering design
- Practical hands-on experience across a variety of projects in the construction industry
- Opportunities for career development and progression in the built environment
- A funded degree program covering tuition fees for the duration of the apprenticeship
- Agile home and office working environment
- Potential benefits after the various qualifying periods including private health insurance and death in service

Apply today to find out how DSA can help you make civil and structural design engineering a bigger part of your life.
