

DESIGN ENGINEER

About the Role

We are seeking a highly motivated and experienced Design Engineer to join our dynamic team. This role offers the opportunity to lead complex structural projects from concept through to construction, mentor junior engineers, and contribute to the ongoing technical excellence of our practice.

A bit about us

- DSA is a leading engineering consultancy specialising in structural design, civil engineering, and project delivery for a wide range of sectors including commercial, residential, educational, healthcare, and infrastructure.
- We pride ourselves on delivering innovative, sustainable, and economical solutions for our clients.
- Our team values collaboration, technical excellence, and continuous professional development.

Key responsibilities

- Design and delivery of structural engineering projects (squarely focusing on steel, concrete, timber, and masonry systems as appropriate).
- Manage project teams, including task delegation, mentorship, and performance feedback.
- Interface with clients, architects, contractors, and other stakeholders to ensure design intent, budget, and schedule are met.
- Prepare and review calculations, drawings, specifications, and design reports.
- Ensure compliance with relevant codes and standards (e.g., British Standards, Eurocodes, building regulations & local regulations) and perform risk assessments.
- Perform structural analysis and modelling (e.g., Revit Structure, Tekla etc. as applicable). (Preferred not essential).
- Conduct design reviews, value engineering, and constructability analyses.
- Lead quality assurance and coordination efforts across design disciplines (M&E, civil, geotechnical).
- Identify opportunities for innovation and sustainable design (e.g., material optimisation, lifecycle assessment, resilient design).

Qualifications and skills

- Bachelor's degree in Civil / Structural Engineering or related field.
- Hands-on structural engineering experience with a track record of delivering complex projects.
- Proficiency in structural analysis and design software (e.g., Tekla Structural Designer, Tedds & Scale).
- Strong knowledge of codes and standards applicable to the UK.
- Good communication and presentation skills.
- Ability to manage multiple projects and prioritise tasks.

What we offer

- Competitive salary and benefits package.
- Flexible working arrangements and a supportive, inclusive culture.
- Opportunity to work on iconic projects with a collaborative multidisciplinary team.
- Access to latest software tools and technology, with ongoing training.

Apply today to find out how DSA can help you make civil and structural design engineering a bigger part of your life.
